New Machine Generation of the Turning-Milling Center N40MC

It's all about Dimensions!

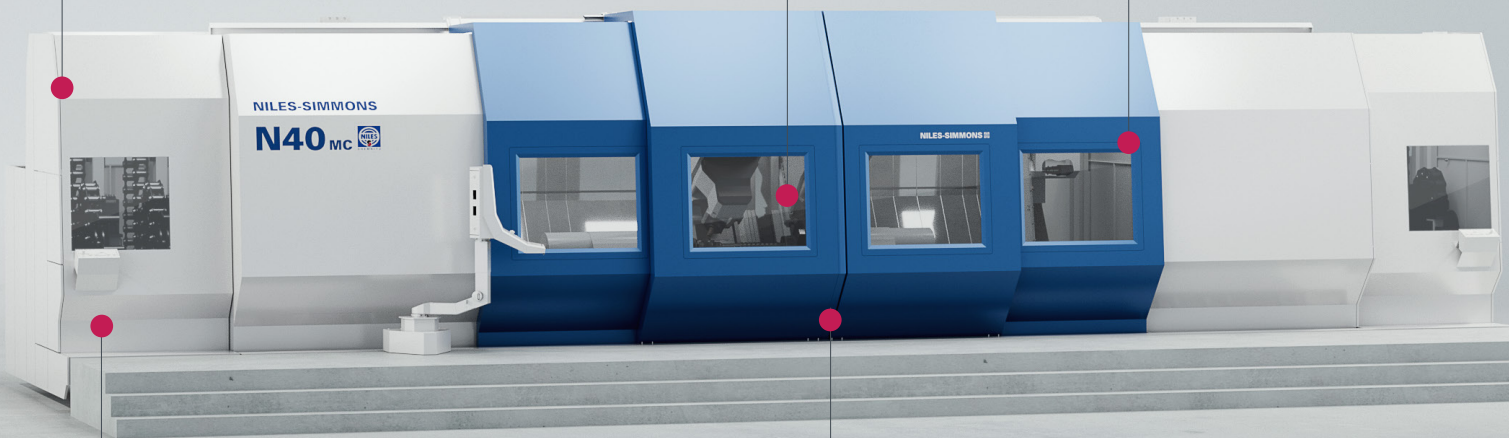

Optimum ratio between footprint and working area of the machine for a maximum workpiece range

Switch off by switching on!

(Almost) unattended machining through new standards in process integration, -automation & -monitoring for highest availability

Your personal Iced Chai-Latte with a dash of caramel & chocolate flakes!

Individual configuration of machining units, drives, interfaces & technologies for your requirements

Precision starts at the base!

From the temperature-stable hydropol bed to robust guideways and the latest generation of machine control systems

For Your Green Conscience!

Thinking about tomorrow today - Efficiency & conserving resources during production and over the entire life of the machine

We are happy to answer any of your questions about technical details of the machine

Mr. Rico Löffler
