

ironMIND

KNOW YOUR MACHINE

CONCEPT

- See**
Capture machine condition and process data
- Understand**
Identify correlations, trends and opportunities
- Decide**
Take action and improve performance

ADDED VALUE

Achieve transparency across your machines and processes to drive better decisions

- Higher availability** | continuous condition monitoring helps prevent unplanned downtime and subsequent damage
- Less non-productive time** | more efficient, predictive, and demand-based maintenance planning saves time, resources, and costs
- More stable processes** | early detection of anomalies and deviations

TOGETHER WE FIND THE RIGHT SOLUTION FOR YOUR PRODUCTION ENVIRONMENT

1 Joint conversation

2 Define use cases

3 Implement your solution

PACKAGE OVERVIEW

See

BASIC

For machine-level transparency

- Machine status and basic monitoring
- Capture relevant machine and condition data
- Historical data and machine-level transparency
- Ideal for individual machines and a first step toward digitalization

Understand

PROFESSIONAL

For multiple machines in one central cockpit

- Central dashboard for multiple machines
- Analysis, trends and deviations
- Efficiency and condition assessment
- Faster response through data-driven insights

Decide

ENTERPRISE

For scalable, multi-site deployment

- Site- and plant-wide transparency
- Advanced analytics and reporting
- Customized integrations and advanced configuration
- For complex production environments and continuous optimization

SEE SOONER. UNDERSTAND FASTER. DECIDE BETTER.

1

Why is the machine stopped?

Identify downtime and its causes faster.

2

When is maintenance really needed?

Base maintenance on actual machine condition, not just fixed intervals.

3

Which machine needs attention?

Keep track of machine status, trends and anomalies.

4

Is the process stable?

Identify deviations before they become costly.

5

Where are we losing time?

Gain transparency into non-productive time, availability and utilization.

6

What do we need to do now?

Turn information into concrete actions.
